

Eclipse™ Fully Vanishing TV Mirror

- High Reflectivity
- Lower Light Transmission

What is Eclipse FVTM?

The Eclipse Fully Vanishing Mirror is a highly reflective, fully vanishing mirror material. It offers the highest reflective properties in the vanishing mirror family. The Eclipse mirror, because of its highly reflective surface, has a higher reflectivity to lower light transmission ratio.

The Eclipse fully vanishing mirror provides the most concealment and is the closest match to a regular silver mirror

What is the best application for the Eclipse Mirror?

The Eclipse mirror is perfect for bathrooms, dressing rooms, public areas, spas, and salons and although the transmission ratio is lower, the Eclipse vanishing mirror still provides excellent viewing and vivid colors when the TV is turned on.

How will the TV look when it is turned on?

Because the Eclipse product has a higher reflective, lower transmission ratio, the TV screen will be slightly darker. However, using an LED TV instead of a LCD TV will increase the brightness, as well as, making adjustments to the TV's overall brightness is recommended.

The picture to the left is an actual picture of our Eclipse mirror product with the TV screen on.

It has not been photoshopped.

How do I order?

Ordering is easy, simply decide what size of mirror you want W x H (up to 59"x96"). Next, enter your dimensions into the rate calculator and follow the instructions to check out. You can also call one of our in-house engineers or sales staff and they will be glad to help you with your purchase. For "plug and play" units, please call sales or visit our website for more product information, pricing and ordering.

Pricing?

As a manufacturer, Decorus is able to offer some of the lowest pricing available on the market today. Order on-line or give us a call and we will be happy to help you with your order.
