

# High-Light™ TV Mirror

The High-light series of vanishing TV Mirror produces the clearest and brightest results of any TV mirror product on the market today.

## What is a High-Light Mirror?

The High-Light Mirror is a low iron float glass that has been manufactured with an optical interference layer which allows for a more defined reflection and transmission.

- 4mm thick
- 30% Reflective
- 70% Transmission

With the TV off: a seamless mirror is visible

With the TV on: a seamless tv picture is visible

The High-Light mirror is fabricated to have a reflective coating on both sides, resulting in the most uniform appearance with respect to transmission and reflectivity.

## What applications are best for the High-Light Mirror?

The High-Light mirror is the best choice for living rooms, bedrooms, restaurants, public spaces and bars. It best used for concealment of large Screen TV's where TV viewing is the primary objective

If the application is that of a bathroom mirror, or an area that is larger than the TV screen, the Eclipse fully vanishing mirror would be the better choice.

## How do I determine the size I need?

Although every installation is unique, the best way to determine the size of mirror to order, is to measure the actual TV, including the housing. This will give you your (W)X(L). If you need assistance you can call us and one of our in-house engineers will be happy to help you.
